Prologue

Fifty years have passed since Simon Belmont vanquished the curse of Dracula.

Fate has dictated that Juste Belmont, blood descendant of the Belmont Family, hunt for the relics of Dracula.

One day, Juste's best friend, Maxim, who had set out on a training expedition two years earlier, returned unexpectedly... his body covered with wounds.

He informs Juste that Lydie, a childhood friend whom they both deeply care about, has been kidnapped.

Maxim has completely lost his memory of his time training away from home, and only has vague images of the kidnapping.

Ignoring his bodily injuries, Maxim leads Juste to the place where he believes Lydie is being held captive.

Passing through thick fog, the two men happened upon a castle undocumented on any map. Could this be the fabled Dracula's castle?

Standing solemnly in the night, this forbidding castle welcomes its unexpected guests as the moonlight shines upon it...

Starting a Game

Starting a Game

Insert the Game Pak into the GameBoy® Advance and turn on the power.

Select START GAME and press the A Button at the title screen to begin game play.

Game System

The castle map is gradually revealed as the player progresses through the castle. The player will come across various items, some of which can be used to help defeat monsters, during game play.

Saving & Loading

Saving and Loading a Game

The main character in this game gains experience while advancing through the story. It is possible to save a game (character level, experience points, items, and game progress) onto the Game Pak. When the game is next played, previously saved data may be loaded and played from the point where the user left off by selecting the save game file from the Select Data screen. A maximum of three save files may be stored on the Game Pak; therefore, up to three players can save their progress using this Game Pak.

Save

Games may be saved in a Save Room. Pressing up on the Control Pad in front of the glowing orb will bring up a message asking the player if he/she would like to save. All game progress conditions will be saved.

Quick Save

This game is equipped with a Quick Save feature for those times when you need to save the game quickly, such as when on a train or when something comes up suddenly, but aren't close to a Save Room. Quick Save allows the player to save the game anytime and anywhere by selecting SAVE ROOM on the Status Screen, this excludes certain cases, such as during boss battles and during story events.

However, when Quick Save data is loaded, the game resumes from the last save room the player used. Experience points, items, and story progress will be saved from the point that the game was saved using Quick Save.

Note that Quick Save cannot be used if the game has not yet been saved in a Save Room.

Load

Previously saved games can be continued by selecting the save data file from the Select Data Screen. When Quick Save data is loaded, the start location will be the last Save Room used by the player. However, character level, experience points, and items, will be restored to their state at the time of the Quick Save.

The Player

Player Attack

The player, Juste Belmont, has two different types of attacks: one with his whip and one using a sub-weapon.

i. Attacking with the whip

Juste's main attack is cracking the whip forward in a straight line. Holding down the attack button and using the Control Pad, allows the player to brandish the whip in all directions.

ii. Attacking with a sub-weapon

Attacking with a sub-weapon consumes hearts. Only one sub-weapon can be used at a time. Sub-weapons are used by pressing up on the Control Pad while pressing the attack button (B Button).

The six types of sub-weapons are shown below.

Dagger

Axe

Cross

Holy Water

Holy Book

Sacred Fist

Spell Fusion

Sub-Weapon Attacks using Spell Fusion™

Spell Fusion™ is a mode of attack in which the player can use a variety of different magic spells. Through Spell Fusion™, the player can combine a sub-weapon and spell book to cast magic spells.

Magic attacks consume player magic points and can unleash an extremely powerful attack capable of giving the player the upper hand. These type of attacks can be performed by turning a spell book on through the SPELL BOOK menu on the Status Screen and using a sub-weapon attack. When the spell book is turned off, the attack becomes a normal sub-weapon attack. Spell books are hidden throughout the castle. The five different types of spell books are outlined on page 17.

Fire Book
The player can cast various spells using the flame power added to the sub-weapon.

Ice Book
The player can cast various spells using the ice power added to the sub-weapon.

Bolt Book
The player can cast various spells using the lightning power added to the sub-weapon.

Wind Book
The player can cast various spells using the wind power added to the sub-weapon.

Summoning Tome
Various apparitions corresponding to the different types of sub-weapons are summoned from the nether world.

The following are examples of the many different spells that may be cast.

i. Fire Book + Axe = Soul of Hydra
Two fire dragons will attack the enemy.

ii. Wind Book + Cross = Guardian Cross
Crosses orbit around the player and ward off enemy attacks.

Items

There are five broad classifications of item types that the player can obtain.

Equip Items

Items that boost whip strength or the player's defensive ability. The whip can be made stronger by equipping it with stones having special magical powers.

Expendable Items

Items that are used up when used, such as recovery items. These items can be used by selecting ITEMS on the Status Screen Menu.

Spell Book

Spell books can enable the use of spell fusion by combining with a sub-weapon. There are spell books with different attributes, including the Fire Book and the Bolt Book.

Relics

These items are necessary in progressing through the game. By the player simply having them in his possession, certain special effects can be performed. The player can turn the effect of each relic on and off. The relic's effect is disabled when turned off.

Collectibles

The collectibles are completely unrelated to the progression of the game. They can be displayed in a special room set aside for viewing.

Hints & Tips

Use the **Down L** whip attack. Use the **L** and **R** buttons to strike enemies and quickly dash out of harm's way.

Use sub-weapons to your advantage, utilizing them strategically to defeat enemies that are difficult to battle with the whip!

- L Spell Fusion™ (magic) is a potent tool when the going gets tough! It's definitely helpful to remember your favorite combinations of spell books and sub-weapons!

This game is set in an immense castle. Keep checking the map by using **SELECT** as you search every corner. Thorough investigation is bound to turn up secret items hidden within the castle walls!
